# ABOUT US

I-Fuel is a government-approved doorstep diesel delivery company providing safe, transparent, and hassle-free fuel solutions for businesses and heavy-usage customers. We ensure on-time delivery, accurate measurement, digital billing, and full compliance with PESO & OMC guidelines.

iFuel is an online platform that provides convenient door-to-door fuel delivery whenever you need it

Ministry of Petroleum and Natural Gas introduced the concept of e-commerce in fuel delivery, many were unaware of how it would revolutionize their lives overnight. With the government amending the Petroleum Rules 2019, startups like iFuel are poised to create a wave of change in doorstep fuel delivery.

## What makes on-demand fuel delivery so transformative?

- I fuel has potential to reinvent the local economy by targeting to employ 1,00,000 delivery partner in coming 5 year.
- I fuel is pioneer fuel logistics company that is focus in all terrain of country that will help build strong service network for other industries.
- iFuel has the potential to reinvent the local economy by employing more than 50 people per site. This initiative not only helps eliminate the black market for lower-quality fuel but also provides stable employment, preventing the need for people to migrate from town to town in search of jobs. Through our doorstep fuel delivery service, we aim to make a significant impact on the lives and economies of remote villages across India.

Powering a quicker tomorrow-full fuel, zero hassles, delivered right to your doorstep.

# OUR VISION

Our projects are structured to benefit the lifestyle and will help in the growth of the local population. Our fuel delivery service will gradually reach to various establishments which are necessary for the remote regions and to the individual households.

**MOBILE PETROL PUMPS AND MINI-PUMPS** are most sustainable distribution models to meet the fuel requirements of various establishments especially hospitals, schools, industries and several other essential services in the remote and rural locations. As these areas are in remote locations, the establishments there require fuel to run their generators and vehicles on a regular basis, therefore, they need to keep a certain quantity for emergencies, acquiring fuel is a simple task but certain issues that related to quality and quantity can't be neglected.

Our aim to minimize the incidence of oil spills in the environment, supply quality fuel through measures and density checks to the clients. It further helps the local population by generating employment opportunities in the hilly areas..

To revolutionise fuel delivery by making diesel accessible anytime, anywhere safely and efficiently.

# OUR MISSION

Our Mission is to revolutionize the IDEA OF FUEL DISTRIBUTION by enabling its reach to smallest household without compromising the quality and quantity of fuel.

This situation needs to be addressed by introducing MOBILE FUEL DISPENSING UNITS AND MINI FUEL PUMPS. Step by step, a chain of events is certainly going to bring a change in the life of the local population and government can implement their programs or launch new ones which were held due to scarcity of fuel in the region.

Furthermore, agriculture can also get benefitted from the settlement of mini pumps and mobile fuel delivery to generate new sources of jobs and income for the people and also ample revenue source for the government.

Our road forward is not an easy one still we are determined to bring change to spread our reach not only to one state but all over India. Our vision is to bring a new wave of change. We in future will also be engaging in other energy sectors and will have planned focus on the renewable sources of energy.

- Deliver high-quality diesel at customer locations
- Ensure 100% accuracy with automated dispensing
- Provide digital convenience and transparency
- Reduce fuel wastage and pilferage

# BUSINESS MODEL

## I-FUEL PVT LIMITED WORKS ON 3 MODELS

Our company works on model i.e. Mobile bowzers which further have sub models varying to the requirements of our business parties which are
